

Care Passport Portal

www.carepassport.ca is your trusted source for access to shareable, standardized mandatory staff training. The portal, managed by CARE-LTC, allows you to register, track, share, and report on mandatory training - all in one centralized system.

CARE-LTC is the Council for Access to Resident-care Education in Long-Term Care. The Council is made up of experienced long-term care professionals who have come together to improve access to training quality across the sector through consistent delivery, tracking, and reporting using the Care Passport portal. CARE-LTC ensure that the training courses, offered by qualified Training Providers have achieved standard required for the training to be recognized across homes

Qualified Training Providers

Training Providers are those offering up modular courses that have been reviewed by CARE-LTC and align with the standardized competencies that allow them to be recognized across the homes. They align with current legislation, are universal, and provide competency focused assessments.

Micro-Credentials

Lambton College's flagship LTC micro-credentials were built with members of the sector to establish the standard that allowed the training to be recognized across LTCs. These courses cover aspects of onboarding and annual mandatory training requirements.

Shareable. Standardized. Simplified.
